# Career Fairy GmbH

## In Python

```
def CareerFairy(student, bored_of_job_ads = „TRUE“):  
    #define CareerFairy function  
    if (bored_of_job_ads == 1):  
        print(„Join our interactive company live streams,“ + student  
        + „!“)  
    elif (bored_of_job_ads == 0):  
        print(student + „“, perhaps you need to scroll through some  
        more job-ads first!“)
```

**CareerFairy(„fellow coders“, 1) # output: = ?**

## In English

CareerFairy is a startup of graduates from ETH Zurich, launched with the vision to connect students with employees that share their background and that are currently working for some of the best companies out there.

Our mission is to create the bridge between talents and employees at work - anytime, anywhere. To do so, we have built a dynamic and highly interactive live streaming platform where employees of a company showcase to you their work, the life at the company and answer all your questions. After finding out everything about the job and meeting the team, you can then directly apply to the company's talent pool to be contacted for future opportunities by the company.

We partner with the Career Centers of ETH Zurich, EPF Lausanne and the Paul Scherrer Institute to host the live stream events.

We are always looking for talented engineers to join our mission and help us in revolutionising the status quo of recruiting. If this sounds like something you would enjoy, send us a message or step by for coffee at our office!

# Hades Technologies AG

## About Hades

We are an ETH Spin-Off with a young and enthusiastic team of 9 computer scientists and environmental engineers, all current or former ETH students. Our mission is to use machine learning to automatically detect damages in sewer inspection videos and tell cities when and how to repair their sewage pipelines. By providing cities with high-quality data about their infrastructure, we allow them to make smarter decisions when maintaining their expensive infrastructure and protect the environment from wastewater leakages.

## Why join?

You work in a stimulating and fast-paced environment with the chance to take on responsibility and are part of a motivated, fun and supportive team. Your contribution is highly valued and has a positive impact on society and the environment. Upon successful completion of your work at Hades, you will have a career-boosting reference of a fast growing startup in the field of artificial intelligence.

# humanAlzed

**Technology for humans.****Based on Artificial Intelligence.**

We are a venture studio and we conceptualize, build, and scale ventures leveraged by AI technologies. Our unique setup, strong skill-set and rich network of partners allows us to provide the technical backbone, business know-how and the necessary financial backup to build a product from vision to production deployment on an industrial scale.

**Our Mission**

humanAlzed offers an end to end service for promising digital products. Based on a lean and agile approach, we assist our product development teams with financial backup, business know-how, and leverage our business network to provide a lead customer in order to test our products in the field as soon as possible.

**Who we are**

We are all techies at heart with an entrepreneurial mindset and a background in engineering or data science. We love topics such as machine learning, cloud computing and DevOps, and we are enthusiastic about shaping the future for humans in the age of Big Data. We are constantly looking for talented and like-minded people to join our growing team in Zurich. If you are looking for a new challenge we would be delighted to get the opportunity to talk to you.

# Legartis

We are Legartis, a legal tech startup that changes the way contracts are analyzed and managed efficiently. Corporate clients love our product, which means we are growing fast and are ambitious. Since our inception in 2017 we have grown to more than 35 people and have won various prizes such as being named by Forbes as one of the best AI start-ups in the DACH region, the 1st prize from << Venture >> in the software vertical, and many more.

## Our mission

Our mission is simple: To be the prime legal tech company that brings legal documents to life and makes information in documents accessible and useful – for everyone in any language.

## Legal AI requires a *confederation of talent*

From world-class product developers, business operations experts, design professionals and legal experts, we celebrate the breadth of perspectives, vision and expertise that are needed to build the leading legaltech AI solutions of tomorrow.

We believe that amazing things can be achieved by a unified, talented and prepared team. Our strengths are boosted by the unique traits of its members who build their careers on many different backgrounds and strongholds.

## Our core values

**Find the dragons:** We are given a lot of space to raise ideas and innovate, pushing each other to reach our full potential.

**Make heroes:** We make time to help each other and stretch beyond the boundaries of our roles.

**All aboard:** We debate, we challenge each other respectfully and once a decision is made, we all hop on the train.

## Join our Legartis talent force

It's the Legartis team that makes us special because of our diverse mix of talent and perspectives. Want to join us in Zurich or Lisbon? Find out more on: [www.legartis.ai/about-us](http://www.legartis.ai/about-us)

# Nexus Venture AG

We are the startup behind „**Career Lunch**“ and believe the best way to experience a company is through their employees. At our core, we develop a scalable technology that connects jobseekers with people from the industry. On **career-lunch.com** students and young professionals can apply for a lunch with an employee from one of our partner companies. If qualified, they can meet in a small setting (1-3 talents) directly at the workplace of the employee for an informal lunch exchange. Our web platform automizes the coordination. Partner companies can grow their talent pool in a time- and cost-efficient way and talents get to know the company and its culture authentically.

First launched in October, we already connected hundreds of talents with partner companies such as **PwC**, **Accenture**, **Ringier**, and **Coca-Cola HBC**. As of this semester, further companies such as **Google**, **Bain & Company**, **Deloitte**, **Julius Bär** and **CERN** are available to meet over lunch as well.

Despite our recent history, we are already working with industry leaders. We have high ambitions to grow further and are looking for the right talent to join our team. Our tech team works mostly with TypeScript, GraphQL and Kubernetes. Our business team covers all other functions such as strategy, marketing, sales and UX/UI. Some qualities we are looking for: fast learner, smart risk-taker, growth mindset.

# Nortide

Nortide is a cryptocurrency market maker and broker. We provide liquidity to exchanges, brokers and token projects and we help clients buy and sell crypto currencies. We have an in-house developed trading system with connectivity to more than 30 cryptocurrency exchanges around world.

Our team brings decades of experience from trading, banking and technology. We are looking for talented and ambitious candidates who are interested in launching their career in the crypto space.

## Joining us as a Software Engineer

Work on our high-performance automated trading system, coded in Java. Our system is built in-house. You participate in the full SDLC and contribute significantly to the development of our technology.

We offer you the opportunity to learn more about:

- writing high quality, safe and performant code
- efficient usage of data structures and algorithms
- Modern Java
- Design patterns and best practices

Preferably, you have experience with Unix systems and basic knowledge of Test-Driven Development. Any experience in Vert.X, JavaFx, REST APIs, websockets, ProtoBuf and Gradle is appreciated.

Meet us at KontaktParty to tell us about your preferences and interests! We are looking forward to talking with you.

# ONE PM

## KNOW LESS, LEARN MORE

ONE PM enables Open Banking beyond Cash by seamlessly interfacing with custodian banks and overcoming missing standards in the complex field of securities accounting with learning & scaling mechanisms. We are developing fast and need help turning our vision into reality!

ONE PM the company – an aspiring fintech company, building a cutting-edge application to revolutionize multi-banking asset management and financial data processing & interpretation. With a wealth of experience in private banking, portfolio management systems, mathematics, user interface and database design, we both know the needs of the financial industry and how to realise them.

ONE PM the team – We are a small but diverse team and always happy to meet motivated people from all backgrounds. We love the challenge and have a lot of fun at work. By the way what type are you: Do you store chocolate in the fridge or not?

YOU are – a young, driven, ambitious, diligent, proactive and creative mind that wants to experience real startup life and is motivated & ready to contribute to disrupt the financial industry. Your studies in any type of field are ongoing or recently completed. High technical affinity, a structured & independent way of working and some sense for usability are more important than your background.

We are always happy to meet motivated people from all backgrounds. If you are interested meet us at the Kontaktparty

# uniqFEED

uniqFEED, a spin-off company of ETH Zurich, is a Zurich-based supplier for virtual advertising technology in sports with over 20 computer vision specialists. We offer highly innovative, groundbreaking, and entirely software-based solutions to virtually overlay ads on LED and static perimeter boards, which are added into live TV feeds.

Rights holders for live sports events (e.g., FIFA, football leagues, ATP, MLB) can generate multiple independent feeds with customized and targeted virtual advertisements. Sponsors in sports advertising are currently restricted to a single message in their ads – mostly a brand logo – in order to reach the customer base in all global markets. Now brands can send regionally targeted messages to their customers using slogans in local languages. Sponsors can carefully and selectively customize virtual advertising feeds for each regional market avoiding having to settle for one global ad message for their advertising campaign. Further, physical advertising space can now be sold to more than one brand and from within various countries. Hence, viewers are targeted with ads that are relevant to them and in languages they understand, with products they know from local billboards, TV ads or social media campaigns.

## Where are we?

- Product ready for court sports, such as tennis, table tennis, and badminton.
- Latest live case at the Nitto ATP Finals in London reaching millions of TV viewers.
- Solution for US sports and football in development.
- Company structures ready for substantial scaling (>70% growth in 2019).

## Why are we successful?

- Only fully software-based solution provider in the field of virtual advertising with a proven track record.
- No tampering with any perimeter boards, cameras or other technical equipment, only camera signals and world feed need to be accessed.
- Cost-efficient operation (on-site, remote).
- Scalability in sports and entertainment business worldwide

# Unit8 SA

## Solving the most impactful problems via Big Data & AI.

Unit8 is a Swiss-based startup focused on solving problems of big industries like chemical, aviation, automotive and finance. We're a team of engineers, data scientists and executives who previously worked for silicon companies like Google, Amazon, Palantir or Microsoft. We work with some of the biggest companies in the world to solve the problems that directly affect their business - be it operations, finance, manufacturing or R&D.

Unit8 operates under a set of simple, yet powerful beliefs. We value purpose and profit equally; we always put our customers first; and we emphasize the team over the individual.

Join us in case ...

- You are excited about working with state-of-the-art technology on projects with impact
- You want to be part of experienced 10x engineering team
- You like challenging work close to the domain and customer
- You are interested in a tailor-made mentorship program to raise to your next level
- You want to take the next step to improve our world by *AI for good* initiative

Want to know more about what and how we are doing things here?  
See [unit8.co](https://unit8.co)

If you are interested send your CV to [info@unit8.co](mailto:info@unit8.co)

*Sensational team, democratic tools, lightning-fast results, return on investment. Always working side by side. Taskforce. **Unit8***

# Verity AG

Verity is the global leader in autonomous indoor drone systems and a leading provider of drone failsafe technology. Founded in 2014, Verity's drones have completed more than 200,000 autonomous flights safely above people, in more than 100 venues in 20 countries worldwide. Verity's drones have been used by some of the world's biggest names in entertainment, including Cirque du Soleil and Madison Square Garden, and in global tours of major artists including Drake, Metallica and Céline Dion.

Our software team works on a multitude of challenging and interesting tasks, such as implementing drivers for proprietary embedded platform, defining robust and efficient communication protocols, designing algorithms to retrieve, process, and analyze significant amount of data, and implementing graphical user interfaces for control stations. Currently we have both internships and permanent positions open in our software team. If you would like to work in an interdisciplinary, international team of highly skilled people, then have a look at our career site <https://verity.ch/careers/> for more details.

We are looking forward to meeting you at Kontaktparty 2020!
