

DATA DRIVEN VALUE CREATION

DATA SCIENCE & ANALYTICS | DATA MANAGEMENT | VISUALIZATION & DATA EXPERIENCE

D ONE, Sihlfeldstrasse 58, 8003 Zürich, d-one.ai

About us and what we do

D ONE is one of the leading swiss companies for data, machine learning and artificial intelligence with national and international customers and a team of 40 experts for data driven value creation. D ONE designs and implements projects which create value from data, acts as guide on the journey to a data driven enterprise, and helps companies to shape processes, organizational structure, and company culture, leveraging the hands-on know how along the entire value chain. D ONE was founded 2005 by Simon Hefti, Hans Peter Gränicher and Netcetera AG and actively invests in start-ups in the area of data. D ONE is Microsoft partner with focus data & artificial intelligence.

Our philosophy

Vision

We are building D ONE as a world-class company.

Our ambition:

- to be a talent heaven
- and a leading voice in data-driven value creation.

Mission

We define success by our client's success. To pursue this goal, we combine our success-critical

Competencies:

- Intellectual agility
- Understanding client's needs
- Clever and creative team play
- Getting the job done

To deliver outstanding results with high business value. Presented in a comprehensible form, achieved in an easy-to-do-business-with way.

What we are looking for

- Data-driven value creation requires bright and open minds
- In our team we have all kind of trades e.g science, engineering, business and communication
- A solid technical education in physics or mathematics and an excellent business grasp
- Smarties

Employment / Required qualifications / Entry opportunities

We hire talents when we see them.

At D ONE, you will work on all aspects of data-driven value creation like ETL, DWH design, report implementation, predictive analytics, project management and consulting. Depending on your individual skill level, we will work out a plan to strengthen your skills and to fill your gaps in small and dedicated project teams, working on real-life challenges for clients.

Interview Process

The interview process at D ONE contains 4 interviews with a duration of 45 - 60 min.

The meeting is structured in two parts: first an introduction part with questions & answers followed by solving a problem statement / case to work on.
