

Infosheet Recruitment @konplan

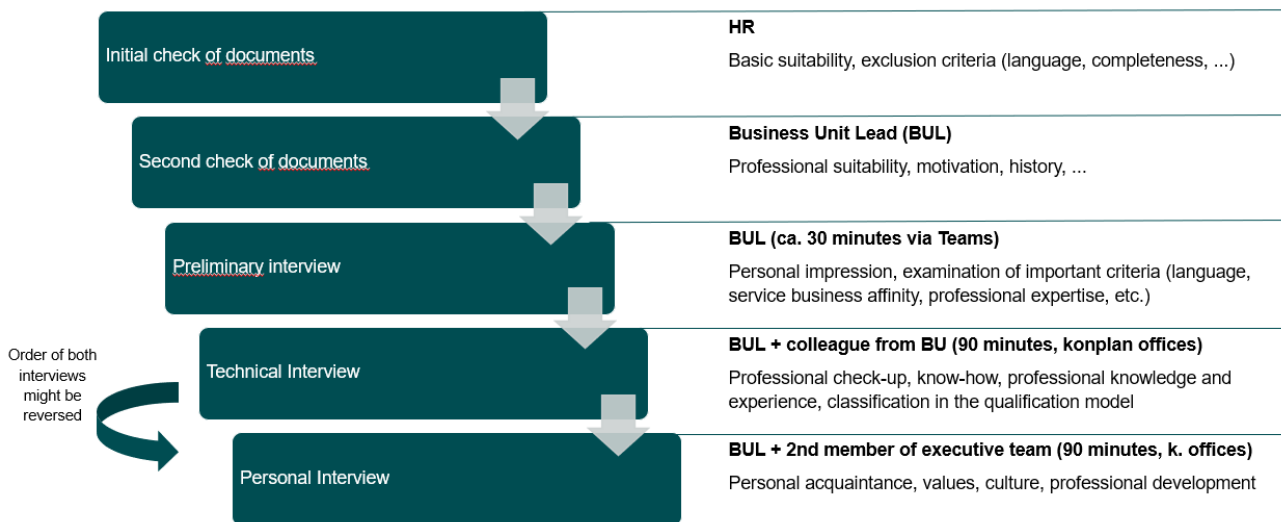

About konplan

Our service in a nutshell? We solve problems!

We give everything to develop the best solution for our customers and support them with our specialists from Embedded Systems Engineering, Mechanical Engineering, Software & Quality Engineering. Our customers are both highly innovative startups and large international corporations, which we support throughout the entire product lifecycle - often in highly regulated and challenging areas such as medical technology.

Overall Process

To ensure that we are a perfect fit to you (and you to us) and that we reach great goals with fun at work, the application process comprises several steps until we hopefully welcome you to the team. We strive to respond within 2-3 days (exceptionally it may take longer).

Salary & benefits

At konplan, we always strive for transparency and fairness, both with customers and among ourselves. Therefore, all career levels are provided with clear requirements and a defined salary range. You will regularly set your individual goals with your business unit manager, so that your further development - and that of your team - is always in focus.

In the application process, you will be transparently classified within the career levels by the business unit manager and a specialist colleague based on your skillset, and will therefore receive a comprehensible, comparable and market-oriented salary - as well as clear prospects for the future. In addition, we offer:

- ✓ Profit sharing for all employees
- ✓ Flexible working hours & flexitime
- ✓ Numerous fringe benefits (Half-Fare Card, discounts, social events, etc.)
- ✓ Travel time to the customer is working time and fully remunerated
- ✓ Working time 40h per week, 5 weeks vacation
