

## Call for Proposals

Dear Expert,

After having a fully in person VIScon in 2021 with multiple hundreds of attendees, we are excited to announce VIScon 2022! This edition will mark the first half a decade in the VIScon journey and in order to reflect this important milestone, this year's motto will allow us to take "a deep dive into the last 5 years of IT development". We are proud to announce that the exhibition and the networking lunches will be back! So get ready for the next VIScon which will take place from the 14th to the 16th of October 2022 in the main building of ETH Zurich. Just like before, the Symposium will happen on Saturday (the 15th of October) and will be accompanied by a three-day Hackathon.

Our goal with VIScon is to inspire students to innovate and push the boundaries of what is possible. Having experienced that there is so much more to computer science and related fields than what could ever be covered during the lectures, we would like to take our attendees on a journey to explore what lies beyond. We aim to turn students into visionaries by providing them with a platform to openly exchange ideas and discuss current problems and potential solutions with experts, hoping that this will help them learn how to solve crucial challenges and make a difference.

In contrast to the VIS Kontaktparty, which is the largest academic IT recruiting fair in Switzerland, VIScon's main focus lies on engaging talks, exciting workshops and interesting discussions. We believe that such interactions, accompanied by company presentations at the Kontaktparty, are one of the best ways to connect with the next generation of computer scientists. Hundreds of tech-enthusiasts, hackers, theoreticians and hobbyists will attend this year's Symposium to listen to your talks, take part in your workshops, experience your exhibition items and connect with you.

The guidelines and further information about the different proposal types and tracks can be found here: [cdn.vis.ethz.ch/vc2/2022/proposal-guidelines.pdf](https://cdn.vis.ethz.ch/vc2/2022/proposal-guidelines.pdf).

Are you ready to support us on this venture and create an impact? Submit your proposal here: [symposium.vis.ethz.ch/en/viscon2022/cfp](https://symposium.vis.ethz.ch/en/viscon2022/cfp).

**Please make sure to read the guidelines carefully and enter all proposals by the 30th of April.**

Feel free to reach out to us if you have any questions! We want to make this journey as easy and as hassle-free as possible.

Kindest regards

David Kalchofner  
Head of VIScon Symposium
