

Call for Proposals

After a successful VIScon 2023 with multiple hundreds of attendees, we are excited to announce VIScon 2024! This year's edition will be the same as last year, but with small twists to make it bigger and better. So get ready for the next VIScon, which will take place from the 11th to 13th October 2024 in the main building of ETH Zurich! Just like before, the Symposium will happen on Saturday (the 12th of October) and will be accompanied by a three-day Hackathon. Newly added this year, will be two short solo competitive programming competitions during the Symposium.

Our aim with VIScon is to inspire students to think creatively and explore the possibilities of computer science and related fields, distinct from typical lectures. We focus on excitement, interactive discussion, and amazement with innovative ideas and technologies.

While VIS Kontaktparty is focused on academic IT recruiting, VIScon offers engaging talks, workshops, and discussions to connect with the next generation of computer scientists. This year's Symposium will attract hundreds of tech enthusiasts, hackers, theoreticians, and hobbyists eager to hear your talks, participate in your workshops, see your exhibits, and connect with you.

The guidelines can be found here: cdn.vis.ethz.ch/viscon2024/proposal-guidelines.pdf.

Are you ready to participate in this incredible event?

Submit your proposal here: symposium.vis.ethz.ch/en/viscon2024/cfp.

Please make sure to read the guidelines carefully and enter all proposals by May 15th 2024.

Feel free to reach out to us if you have any questions! We want to make this journey as easy and as hassle-free as possible.
